TU2SL

Software & Web Application Development

Ref: TU2SL-2026-0823-C
Date: 23 August 2026

Content & Information Checklist

Details required from client before the site can go live

Client:	**Manusha Weerawardene**	Company:	**Spencer Denim Industries Pvt Ltd**
Prepared By:	**TU2SL**	Project:	**Fashion E-Commerce Website**
Address:	**Kumarage Mawatha, Padukka**	Related Document:	**Project Proposal, TU2SL-2026-0823**

The items below are content and account details we need from you to complete the build. Send whatever you have — for anything not ready yet, we'll use a reasonable placeholder and swap it in before launch.

1. Store Policies

Item	What we need
Return & Exchange Policy	Full written policy — return window, condition requirements, who pays return shipping, refund method/timeline
Shipping / Delivery Policy	Delivery areas covered, cost per district/zone, estimated delivery times, cash-on-delivery availability if any
Privacy Policy	Confirm if you have one already, or if TU2SL should draft a standard e-commerce version for your review
Terms & Conditions	Same as above — existing document, or draft for your review

2. About / Company

Item	What we need
Brand story	How the business started, background, what makes it different
Company details	Registered business name, address, registration number (only if you want it shown), contact email/phone for the About page
Mission / values	Optional — short statement if you have one

3. Contact & Social

Item	What we need
Customer support	Phone number, email, and support hours for the Contact page and footer
WhatsApp number	Number to connect to the site's WhatsApp contact button

Social media links	Which platforms to link (Instagram, Facebook, TikTok, etc.) and the exact handle/URL for each — or confirm none yet

4. Store Setup

Item	What we need
Domain name	Preferred domain name(s), in priority order, so we can check availability before purchasing
Brand colour palette	Confirm you're proceeding with our proposed Denim & Co. × Natural Linen blend, or send your own brand swatches to match instead
PayPal account	Business account details to connect for online payments
Bank account details	Account name, number, and bank branch to display for the "Bank / Online Transfer" payment option at checkout

Note: None of the above blocks development from starting — build work proceeds on the agreed scope and theme regardless. This content is needed before go-live so the store isn't launched with placeholder policies, contact details, or payment accounts.
